Notes

Installation

Run the included setup.exe file on the CD-ROM. Follow the on-screen installation instructions until the process is complete.

How to Play

Make the greatest game school in the world!

Spend money to construct new rooms, or upgrade existing ones.

Manage different variables such as acceptance GPA or student tuition rates to get more students or get more tuition per month.

Get good students to graduate to gain “rep.” If a student's motivation reaches 0, or his GPA falls too low, he will drop out, causing you to lose a student and also lose some “rep.”

Once you gain 500 “rep,” you win! If you drop below \$100,000, though, you’ll be too far in debt to recover!

Ed's Protip Corner!

Build a lot of classrooms! Students need classrooms to study, plus more classrooms means more room for students!
